

# FARNAX®-CODIP

## Optimal mastitis-prevention after milking

- Strong disinfecting
- Maximum protection in difficult circumstances
- Faster sphincter closing

### WHEN TO USE?

- In cases where there is a high risk of mastitis
- When there is a high infection pressure: humid climate, wet, dirty bedding,....

### EFFICACY

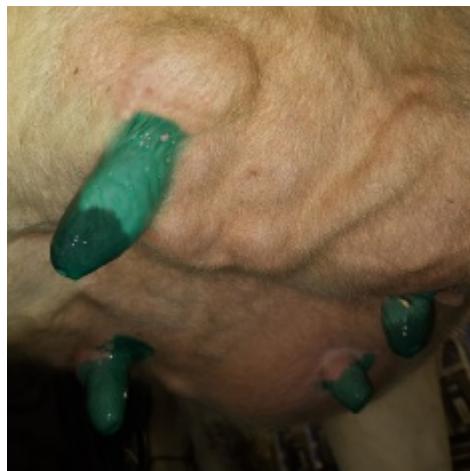

Farnax®-CoDip gives an optimal protection against different types of mastitis, caused by bacteria:

- Environmental
- Clinical
- Subclinical

### COMPOSITION

Farnax®-CoDip is a 2-compound teat dipping product, based on chlorine dioxide. The high amount of emollients (sorbitol and glycerol) results in a unique formula with maximum teat protection.

Thanks to its high covering properties, Farnax®-CoDip supports a faster sphincter closing and so reduces the time where bacteria could enter the teat.

### INSTRUCTIONS FOR USE

- Mix both compounds and let react for 1 – 4 hours  
(after mixing the product is stable for at least 3 weeks)
- Apply the product with a dipping cup
